

ABSTRACT OF THE DISCLOSURE

Each wireless communication terminal unit is detachably attached to a gaming machine (1A-1H, 2A-2H). The transmitting/receiving device transmits/receives a predetermined information signal to/from a terminal, a gaming machine (1A-1H, 2A-2H), a mobile terminal (5A, 5B), or an information managing apparatus (4) in response to an information signal received from the mobile terminal (5A, 5B), by way of a receiving section which wirelessly receives information from the mobile terminal (5A, 5B).
